Alternate Method
Initiate the plunger of the 3ml syringe (nudge upwards) with your thumb, and apply slight pressure to the Big Shot syringe, in a downward motion.
3. TISSUE Goo 3ml syringe plunger will tilt sideways slightly when full. Alternatively, watch the internal black “O” ring as it approaches the top of the syringe barrel.
4. Replace TISSUE Goo Big Shot cap for storage.

Important Notes:
ALWAYS REFILL SYRINGES SLOWLY!
It is important to replace all manufacturer’s shipping caps when you have completed refilling your TISSUE Goo 3ml syringe. Failure to do so will result in potential leakage and dehydration of TISSUE Goo.

TWO REFILLING OPTIONS

Tabletop Refilling
1. Hold the Big Shot (with empty, 3ml syringe attached) vertically on a tabletop.
2. Initiate the plunger of the 3ml syringe (nudge upwards) with your thumb, and apply slight pressure to the Big Shot syringe, in a downward motion.
3. TISSUE Goo 3ml syringe plunger will tilt sideways slightly when full. Alternatively, watch the internal black “O” ring as it approaches the top of the syringe barrel.
4. Replace TISSUE Goo Big Shot cap for storage.

Important Notes:
ALWAYS REFILL SYRINGES SLOWLY!
It is important to replace all manufacturer’s shipping caps when you have completed refilling your TISSUE Goo 3ml syringe. Failure to do so will result in potential leakage and dehydration of TISSUE Goo.
For Professional Use Only

Tissue Goo is a Berry Flavored Hemostatic Gel containing 25% aluminum sulfate. NPN 02445631

Indications for Use:

For the purpose of aiding in gingival retraction and to control bleeding, as well as to reduce the mucosa membrane inflammation associated with dental impression procedures, and Class V restorations or other tissue management problems in other phases of dentistry. This product is for topical use only. Tissue Goo is compatible with any type of impregnated cord or plain cord.

Contraindications:

None.

Gingival Retraction Procedures or Crown and Bridge Procedures:

1. Remove the cap from the 3ml syringe and twist on a needle tip. (Fig 1).
2. If bleeding is excessive following tooth preparation, syringe additional Tissue Goo around the gingival margin to the entire preparation. (Fig 1).
3. Rinse the prepared tooth.
4. If bleeding occurs, the site should be rinsed and dried. Additional Tissue Goo is then placed over the packed retraction cord. Allow sufficient time for the tissue to retract (2-6 mins).
5. If still bleeding, rinse, dry, and re-syringe Tissue Goo gel. Wait 2-6 mins.
6. Remove cord. Rinse and dry (Fig 3).
7. Take impression as usual.
8. Take impression as usual. Remove the cap from the 3ml syringe and twist on a needle tip.

Preparation:

Rinse the prepared tooth.

4. First Aid Measures:

Induction: Ingestion: Wash mouth with large amounts of water. Skin: Flush with water for at least 15 minutes. Eye: Flush well with water for at least 15 minutes. Specific Procedures: First Aid: Facilities: Seek medical assistance for further treatment, observation and support if necessary. Additional Information: None known

Fire Fighting Measures:

Extinguishing Media: Fire: Water is not considered an extinguishing medium. Use of water may cause the material to become a larger fire. Baking Soda: CO2, or dry chemical. Material will not burn if carbon dioxide is used. Precautions in connection with fire: Use of: Water is not recommended. Specific Hazards: None

Emergency Procedures:

Keep personnel away if necessary.

Handling and Storage:

Handling: Use original container.

Storage: Store in cool, well-ventilated area.

Exposure Controls/Personal Protection:

Exposure Limits: Not determined.

Special Hazards: None

Incompatibilities: None

Conditions to Avoid: None

Chemical Stability: Stable under ordinary conditions of use and storage.

Hazardous Decomposition Products: None known

Hazardous Reactions: None known

Toxicological Information:

Hazardous Ingredient(s) Name: Aluminum Sulfate, USP

Labeling: Material is not hazardous. This product is for topical use only.

Precautionary Phrases:

For professional in-office use only. Keep out of reach of children. Poison Schedule: None allocated.

In no event will the manufacturer or the distributor be responsible for damages of any nature whatsoever resulting from the use of or reliance upon this information.

Sds History:

Date of Issue: May 28, 2015

Replaces Issue: June 15, 2014

Changes made to previous issue: Added GHS classification, pictogram information, hazard & precautionary statements.
