INSTRUCTIONS FOR USE
Glisten Provisional Resin Glaze is a light-cure, one component varnish which cures hard, and without any smear layer. Glisten is for coating surfaces of temporary crowns or bridges based on acrylic and bisacrylic systems.

PROPERTIES:
The special properties of Glisten are its fully dry surface without leaving a smear layer after light polymerization, its hard, high gloss, and more abrasion-resistant surface. The resistance of the covered crown and/or bridge will even be improved against solvation by some denture cleaning agents and against food deposits and plaque.

APPLICATION:
1. Remove the provisional material smear layer with a suitable solvent (e.g.: alcohol).
2. Apply a thin layer of Glisten without inclusion of air bubbles with a brush onto the dull and dry provisional restorative surface.
3. Light-cure the Glisten coating immediately after application:
   - Dental Halogen Light-Cure Unit (min. 500 mW/cm²): 20 sec.
   - LED Curing Light (min. 1000 mW/cm²): 40 sec.
4. If required, after light-curing, clean the surface with alcohol and water. The surface will shine with a high gloss.

Note: Close bottle immediately after use.

CONTRAINDICATIONS:
Glisten is free of methylmethacrylate. Do not use with patients with known allergies to methacrylates. In case of an allergic reaction, please contact a physician.

WARNINGS:
Glisten is flammable. Avoid sources of ignition and do not store in direct sunlight. In case of contact with oral tissue or skin, flush immediately with water. In case of contact with eyes, flush immediately with water and seek medical attention.

STORAGE:
Store Glisten protected from light. Do not store above 25˚C/78˚F. Do not use after expiry date.

SAFETY DATA SHEET CONTINUED
SAFETY DATA SHEET

SECTION I: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

Hazardous Substance

CAS-No. [141-78-6], EC-No. 2005-500-4 Ethylacetate

GHS02, GHS07

SECTION II: HAZARDS IDENTIFICATION

CAS-No. [141-78-6], EC-No. 2005-500-4 Ethylacetate

TRGS900

SECTION III: COMPOSITION/INFORMATION ON INGREDIENTS

Ethylacetate

SECTION IV: FIRST-AID MEASURES

Skin:

Rinse opened eye for several minutes under running water with plenty of water and soap.

Inhalation:

Fresh air.

Contact with eyes or skin:

Avoid contact with eyes or skin.

Contact with mucous membranes:

Irritation of mucous membranes, loss of appetite, headache, drowsiness.

Contact with skin:

Repeated exposure may cause skin dryness or cracking.

Repeated exposure may cause swelling of the face or other mucous membranes.

Inhalation:

No further relevant information available.

Eye:

Fresh air.

Inhalation and Swallowing:

Possible reactions to acrylates after long-term exposure are possible. When used and handled according to specifications, the product does not have any harmful effects to the experience and the information provided to us.

Primary irritation:

Skin: Repeated exposure may cause skin dryness or cracking.

Eye: Straining irritating effects.

Water/ground-water:

No further relevant information available.

Inhalation and Swallowing:

Irritation of mucous membranes, loss of appetite, headache, drowsiness.

Additional Toxicological Information:

Allergic reactions to acrylates after long-term exposure are possible. When used and handled according to specifications, the product does not have any harmful effects to the experience and the information provided to us.
