

5. Fire Fighting Measures

FIRE FIGHTING PROCEDURES: General: Evacuate all personnel; use protective equipment for fire-fighting. Use self-contained breathing apparatus when the product is involved in fire.

FIRE FIGHTING EQUIPMENT: Foam, dry chemical, carbon dioxide (CO₂).

6. Accidental Release Measures

SMALL SPILL: Clean up spills immediately, observing precautions in Protective Equipment section.

LARGE SPILL: Absorb with inert, damp non-combustible material, then flush area with water.

7. Handling And Storage

HANDLING: Use suitable protective equipment.

STORAGE: Room Temperature

8. Exposure Controls/Personal Protection/Personal Protective Equipment

EYES AND FACE: Wear eye protection.

SKIN: S36: Wear suitable protective clothing.

RESPIRATORY: S38: In case of insufficient ventilation, wear suitable respiratory equipment.

9. Physical And Chemical Properties

PHYSICAL STATE: Gel

ODOR: Odorless or no characteristic odor

COLOR: White

10. Stability And Reactivity

STABLE: Yes

CONDITIONS TO AVOID: Strong acids, strong bases, and oxidizing agents.

HAZARDOUS DECOMPOSITION PRODUCTS: Carbon dioxide, carbon monoxide, nitrogen oxides, sodium hydroxide, and ammonia

11. Toxicological Information

EYE EFFECTS: May cause mild irritation.

SKIN EFFECTS: May cause slight irritation.

12. Ecological Information

ENVIRONMENTAL DATA: No data available. Contact Env. Dept.

13. Disposal Considerations

DISPOSAL METHOD: Dispose of in compliance with governmental regulation (EC 1975L0442--20/11/2003)

14. Transportation Information

AIR (ICAO/IATA)

PRIMARY HAZARD CLASS/DIVISION: No classification

VESSEL (IMO/MDG)

PRIMARY HAZARD CLASS/DIVISION: No classification

15. Regulatory Information

EUROPEAN COMMUNITY

EEC LABEL SYMBOL AND CLASSIFICATION

"Xi" - Irritant

R36/38: Irritating to eyes and skin.

16. Other Information

RELEVANT R-PHRASES: R36/37/38: Irritating to eyes, respiratory system and skin.

INSTRUCTIONS FOR USE

Description & Indications:

TUNNEL VISION Endodontic Lubricant & Chelating Gel is a 19% EDTA dentin chelating agent in an aqueous, water-soluble solution with a lubricating base.

Indications:

Use TUNNEL VISION Endodontic Lubricant & Chelating Gel to aid in instrumentation and debridement of root canals.

Procedure:

PRELIMINARY STEPS:

PRELOADED 1.2ml SYRINGE DELIVERY:

1. Remove Luer Lock cap from the syringe.
2. Twist an Endo Flex Tip® firmly onto the syringe. For optimal control, hold syringe with plunger in palm of hand, instead of in conventional manner with thumb on plunger.

Procedure:

1. The Endo Flex Tip can be used to deliver TUNNEL VISION Endodontic Lubricant & Chelating Gel directly into the canal opening. When the canal is difficult to find, start by placing point of file into canal opening prior to introducing TUNNEL VISION Endodontic Lubricant & Chelating Gel to pulp chamber (or onto file.) Visibility is not impaired.
2. Once canal opening is engaged, express TUNNEL VISION Endodontic Lubricant & Chelating Gel through tip into canal to no more than half the working length. As an alternative, a small amount of TUNNEL VISION Endodontic Lubricant & Chelating Gel can be placed directly onto file.
3. TUNNEL VISION Endodontic Lubricant & Chelating Gel is only used with the first two or three instruments. A thorough amount of sodium hypochlorite is used during entire instrumentation and cleansing procedure, alternating with liquid EDTA between each file.
4. TUNNEL VISION Endodontic Lubricant & Chelating Gel is irrigated and rinsed from canal, similar to other root canal preparations.

Precautions:

1. Deliver only to canal orifice. Do not express material with pressure up canal past apical foramen.
2. Tips are disposed after use.
3. Clean and disinfect syringes between patients.
4. Endo Flex Tips do not have a side port hole. Do not express past apex.

STORE AT ROOM TEMPERATURE

General Precautions:

1. For professional use only.
2. Review instructions, precautions, and MSDS before beginning treatment. Use only as directed.
3. Keep products out of heat/sunlight.
4. Avoid skin exposure to resins.
5. Isolate strong chemicals to area of treatment.
6. Confirm that patient has no known allergies to treatment materials.
7. Test flow of materials from syringe and tip before using intraorally.
8. Never force syringe plungers.
9. Use syringe covers and/or clean and disinfect syringes between patients.

WARRANTY:

Clinician's Choice Dental Products warrants this product will be free from defects in material and manufacture. Clinician's Choice Dental Products makes no other warranties including any implied warranty of merchantability or fitness for a particular purpose. User is responsible for determining the suitability of the product for the user's application. If this product is defective within the warranty period, your exclusive remedy and Clinician's Choice Dental Products' sole obligation shall be repair or replacement of the product.

LIMIT OF LIABILITY:

Except where prohibited by law, Clinician's Choice® Dental Products will not be liable for any loss or damage arising from this product – whether direct, indirect, special, incidental or consequential, regardless of the theory asserted, including warranty, contract, negligence or strict liability.

3. Hazards Identification

Hazards Designation

"Xi" - Irritant

R36/38: Irritating to eyes and skin.

POTENTIAL HEALTH EFFECTS

EYES: R36: Irritating to eyes

SKIN: May cause slight irritation.

INGESTION: Irritating to mouth, throat and stomach.

INHALATION: Dust and processing vapors may cause respiratory tract irritation.

4. First Aid Measures

EYES: Immediately flush eyes with plenty of water. Get medical attention, if irritation persists.

SKIN: Wash with soap and water. Get medical attention if irritation develops or persists.

INGESTION: Give large volumes of water. Do not induce vomiting. Consult a physician if ingested in large amounts.

INHALATION: Remove to fresh air. If not breathing, give artificial respiration or give oxygen by trained personnel. Seek immediate medical attention.
